## New contact for wall and ceiling bearings and vibration isolation

Dear Sir or Madam  
Dear business partner and customer,

In recent years mageba has focused more and more on the infrastructure and industry sectors and has expanded and continuously strengthened its core competencies in the product lines of joints, bearings, seismic protection and structural health monitoring. In the course of the portfolio optimization in the building construction area, the management of mageba sa has decided to sell two successful product lines and to continue to focus on the remaining product lines. **mageba will continue to support you in the future within the remaining product segments of structural bearings and joints for your building construction projects.**

We are therefore pleased to announce that **Vibraplast AG** will take over the areas of **wall and ceiling bearings as well as vibration isolation**. We are convinced that in Vibraplast an ideal new partner for these products has been found and thus the high product quality paired with comprehensive service can continue to be maintained. As early as **May 1, 2021**, Vibraplast AG will be your new contact for the product segments concerned.

All current orders have been finalized and completed by mageba. New inquiries are already forwarded to the new owner and will be processed there.

We wish Vibraplast AG great success and good business and would like to thank you for the good cooperation and trust in the past years.

Best regards

mageba sa

  
Niculin Meng  
CEO mageba Schweiz

  
Daniele D'Alonges  
Head of Sales Buildings

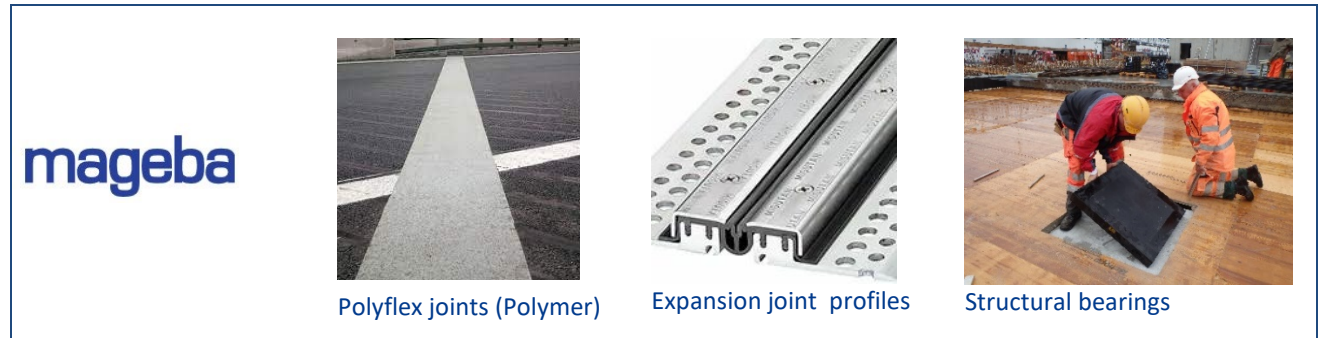

Product overview and contact information from May 1, 2021:

Ceiling bearings

Wall bearings

Vibration isolation

Polyflex joints (Polymer)

Expansion joint profiles

Structural bearings

Your new contact for **wall and ceiling bearings and vibration isolation** as of May 1st, 2021:

Vibrplast AG  
Mr. Antonio Dutly  
Wittenwilerstrasse 25  
CH-8355 Aadorf

Tel. +41 52 368 00 50  
[info@vibrplast.ch](mailto:info@vibrplast.ch)  
[www.vibrplast.ch](http://www.vibrplast.ch)

We are still there for you in the building construction sectors of **expansion joints, polymer joints (Polyflex) and structural bearings**:

mageba sa  
Mr. Daniele D'Alonges  
Solistrasse 68  
CH-8180 Bülach
